

X. DATES OF PUBLICATION AND BIBLIOGRAPHICAL NOTES
(contd from p.570)

A g o s t i, G., De re botanica tractatus, etc.

Cf. R.E.G.Pichi-Sermolli, mimeo in nom.gen.cons.committee 1954-1959, p.39.

The work should not be considered for purposes of priority as the genera established by Agosti are not validly published according to Art.15 (Art.5 of the 1956 Code), since he alters the order of taxonomical categories, using the term genus, division, and subdivision in a wrong sense and in misplaced order. For his species he did not adopt the binary nomenclature.

B l u m e, C.L., Rumphia, etc.

Cf. also Bot.Zeit. 1 (1843) 660 (Sept.22).

Reference contains a review of fasc.25-30, p.93-176 of vol.2! Contrary to what I supposed this 2nd volume evidently also consisted of 15 parts, fasc.16-30.

The text of fasc.25-30 includes 3 pages (174-176) Consp. tabularum pertaining to pl.71-137 (of which pl.71-85 appeared with fasc.13-15, as already mentioned in Fl.Mal. I, 4,

1954, p.clxxii). At the same time, viz first half of 1843, pl.138-168 of vol.3 were issued.

On the wrappers of fasc.25-30, volume 3 and Supplement were announced for 1843. As yet I found nothing to sustain H.C.D.de Wit's opinion that the text of fasc.31-36 (vol.3) was really issued in 1843, and the title-page date, 1847 (wrongly mentioned as 1837 in Pritzel Thes.), makes it really very improbable. As the Teyler Library at Haarlem received these fascicles Jan.20, 1849, it seems to be on the safe side to accept that date for vol.3.

B l u m e, C.L., Collections des Orchidées, etc.

Cf. Gard.Chron. (1859) 99 (Feb.5); R.Tournay, Bull.Soc.R. Bot.Belg. 90 (1958) 343-346.

Only one volume published.

Part	Pages	Plates	Dates
1-2	(i-iv 1-30)	1-11 (14)	1858 (Nov.3 received in England)
3-4	31-58	12-22 (12)	1858
5-6	59-?	23-? (?)	?
7-8	?-114	?-42 (?)	?
9-10	115-150	43-54 (12)	1859
11-12	151-190	55-66 (12)	1859

B l u m e, C.L., Flora Javae, etc.

Cf. also R.Tournay, Bull.Soc.R.Bot.Belg. 90 (1958) 343-346.

Author stresses the probability that the Orchidaceae (ser. II vol.1; no other volume published) will have been published in parts from 1858 till 1859, as the "Collections des Orchidées".

B u r m a n, N.L., Flora Indica.

The book is correctly dated 1768. In April of that year Burman sent copies to Kleinhof, Linnaeus, Miller, etc. (vide concept letters in the University Library Amsterdam).

J a c q u e m o n t, V., Voyage dans l'Inde, etc. Vol.4 Botanique, by J.C a m b e s s e d e s (& J.D e c a i s n e).

The title-page date indicates 1844. H.W.Rickett (MS) says that in a notice in Isis von Oken for 1843 it was stated that of the botanical part p.1-103 had appeared with the pertaining plates up to no.134. In the work itself it was said "avis au relieur" at the end of vol.4 indicating that it has appeared in instalments. Therefore:

Pages	Plates	Dates
1-104	1-134	1843
105-183	135-180	1844

M a r t i u s, K.F.Ph.von, Historia naturalis Palmarum, etc.
Cf. also Isis Heft 10 (1842) 796-798; Flora 32 (1849)
317-320; Bot.Zeit. 10 (1852) 193-198; O.Beccari, Ann.R.Bot.
Gard.Calc. 11 (1908) 40-41; Dr R.Lorentz in litt. (March 13,
1959).

Part 6-7 appeared from Jan.1837-Sept.1838 (cf. Isis, l.c.).

Part 8 was issued 1 Sept.1845 (cf. Flora, l.c.).

The whole work was finished in 1850 (cf. Bot.Zeit., l.c.),
so part 10 must have been published in 1850 and not in 1853.

Beccari stressed the fact that the 2nd edition of part 7
(according to him p.179-230 of vol.3, but correctly p.181-
260!) was in reality a new edition, very different from the
original. As this 2nd edition was issued partly with part 8
(viz p.231-260), and partly with part 9 (p.181-230) (see al-
so Fl.Mal. I, 4, 1954, p.cc), changes and additions must
certainly be regarded as published either Sept.1, 1845 (p.231-
260), or March 15, 1849 (p.181-230).

M a r t i u s, K.F.Ph.von, Genera et species Palmarum, etc.

Cf. also Bot.Zeit. 14 (1856) 728.

The work was sold at choice either with coloured or un-
coloured plates.

The first part appeared Sept.1856.

M i k a n, J.Chr., Delectus Florae et Faunae brasiliensis.
1820.

Cf. W.T.Stearn, J.Soc.Bibl.Nat.Hist. 3, 3, p.135-136.

Part	Plates	Dates
1	1-6	late 1820
2	7-12	mid - 1822
3	13-18	July-Oct.1823
4	19-24	1825

M e i s n e r, C.F., Plantarum vascularium genera. 1836-43.

Cf. W.T.Stearn, Taxon 7 (1957) 188.

The DeCandolles placed MSS on the families Bignoniaceae,
Boraginaceae, Campanulaceae, Ericaceae, Pedaliaceae, etc. at
Meisner's disposal when the latter was preparing his Plant
vasc.gen., and a number of genera proposed by them and Mar-
tius were accordingly published in Meisner's work.

The work appeared in 14 parts. Part 7, containing Tab.
diagn. 221-256, Comm. 137-160 (Aug.1839), antedated Prodro-
mus 7 (Dec.1839); part 8, Tab.diagn. 257-284, Comm. 161-192
(Apr.1840), and part 9, Tab.diagn. 285-312, Comm. 193-224
(Nov.1840), antedated Prodrum 9 (Jan.1845) and 10 (Apr.
1846).

Stearn cites several genera first published by Meisner in
this way.

M i q u e l, F.A.W., *Sertum exoticum*, etc.

Cf. Bot.Zeit. 2 (1844) 169 (March 8); G.A.Pritzel, Thes. Lit.Bot. 1872.

The year of issue given by Pritzel is 1842, but the review in Bot.Zeit. makes mention of the fact that they had seen copies of the first and only part (8 pages, 5 pl.) dated 1842, and others 1843! Probably the last mentioned year was the factual year of issue.

M i q u e l, F.A.W., *Systema Piperacearum*.

Cf. Bot.Zeit. 2 (1844) 157 (March 1), 604 (Aug.16).

Part	Pages	Dates
1	1-304	1843
2	305-575	1844

(before Aug.)

N e e s a b E s e n b e c k, *Genera et species Asterearum. Norimbergae, sumtibus Leonardi Schrag. MDCCCXXXIII, xiv + 300 pp., 1 graph. Ankündigung.*

A literatim edition of the work under the same title, published in 1832. At the end of the "Ankündigung" (notice to the public) the author explains that the publisher of the 1st edition, J.D.Grüson, has sold his office and cannot edit the *Icones Asterum*, which should accompany the book. As far as I can ascertain they have never been published.

N e e s a b E s e n b e c k, *Agrostographia capensis. Deno impressa. Halae, sumtibus H.W.Schmidtianis. MDCCCLIII, xx + 490 pp. (p.491 Errata).*

The text of this work, which is not mentioned in Pritzel's Thesaurus, is a literatim second edition, under another title, of Nees ab Esenbeck's *Florae Africae Australioris illustrationes monographicae. I. Gramineae. Glogaviae sumtibus Prausnitzianis. MDCCCXLI*. It lacks the dedication to Drège, Ecklon, and Zeyher, and has slight changes in the wording at the end of the preface which is dated June 1853. It seems that it does not represent a new impression but is part of the original stock.

Rückkunft Reinwardts. Elenchus seminum quae pro communicatione mutua botanicis ex horto academico leidensi offeruntur. A. 1823 (in Isis 1, 1823, 309-319).

This contains (p.309-312) a short anonymous account of Reinwardt's endeavours to collect seeds, timbers, etc. in Java and the bad luck he had with shipwrecks by which large collections were lost.

In the Elenchus seeds are offered for exchange which he has brought from his travels in addition to those which had been raised in the Leyden Botanic Gardens. In this list oc-

cur names of a number of new genera and numerous new species which have been provided with his authority indicated by the letter "R".

The specific names are all nomina nuda. Nine of them belonged to undescribed genera, and as the readers naturally did not know their affinity or habit, Reinwardt provided these new genera with the briefest indication possible in Latin footnotes. These were certainly not meant as scientific descriptions. According to the opinion of the editor of Flora Malesiana, shared by Dr Bullock at Kew, they are nomina semi-nuda which should not serve for purposes of priority. All were later published with tolerably large diagnoses in Sylloge Plant. Ratisb. (1826), *Gouania ferruginea* excepted.

R i c h a r d, A., Mémoire sur la famille des Rubiacées.

Cf. W.T. Stearn, Taxon 7 (1957) 186-188.

This work occupies vol. 5 of the Mém. Soc. Hist. Nat. Paris (1834) 81-304. Due to several circumstances the printing of this volume, which was started April 1829, was held up for several years.

Nevertheless A.P. DeCandolle cited in Sept. 1830 (Prodr. 4, p. 341-621) pages of this volume not published until mid-1934. The explanation was found in a separate edition of the "Mémoire" issued by Richard in Dec. 1830 with an independent pagination. MS and later paged proofs were generously sent by Richard to DeCandolle.

The sequence of the works concerned is:

A. Rich. in DC. Prodr. 4 (Sept. 1830); A. Rich., Mém. Fam. Rub. (Dec. 1830), reimpr. in Mém. Soc. Hist. Nat. Paris 5 (1834).

R o e m e r, J.J., Collectanea ad omnem rem botanicam spectantia.

Cf. also Zuccagni, Synopsis plantarum, preface, dated Nov. 1806.

The first volume was evidently issued in 1806 and not in 1807 (as mentioned in Fl. Mal. I, 4, 1954, ccix).
