N o t e. The publication by Novák (Preslia 10, 1931, 5-41) with its bibliography must be considered as of imminent importance as to the year of publication. In case of still questionable priority it is advisable to consult McGillivray's paper which also includes month and year when the fascicles were inserted in Naturae Novitates.

Pages of the reprints of Band 22 can be found in Fl.Mal. Bull. no. 5 (1949).
